LED Wall Pack

Advantages:

- Dissipates an amazing 120 watts of total power
- Provides up to, or in excess of 65,000 hours of light
- Gives a more focused and higher lumen value light
- Contains a solid state lighting element, eliminating several risk factors
- Responds instantly and does not require a warm up period
- Generates less heat
- Illuminates within intended areas only using its narrow beam angle feature, promoting higher overall system efficiency
- Mercury and lead free

	# of Fix.	Fix. Watts	Life Hours	Total K watt	Total Hours	K watt Rate	Consumption Charge/Year
LED Wall Pack (60 Watt)	1	60	65,000	0.06	5000	0.14	\$42.00
Standard Metal Halide Wall Pack (250 Watt)	1	280	5,000	0.28	5000	0.14	\$196.00

Truly the Last LED Wall Pack You'll Ever Have to Buy!

Serviceable

The LED Wall Pack uses the newest Array system technology that combines "Smart Thermal Management" with high consistent lumen output. In addition, unlike other wall packs, the LED Wall Pack's LED array is a serviceable component of the entire unit, which allows the owner, after the 65,000 hours or 5 year warranty, to replace only the emitter within the fixture and continue using the fixture for years to come.

Long Lasting

Within the LED Wall Pack's head is an LED power driver which has been rated for 300,000 hours of use - in other words, at 12 hours per day of usage, the LED Wall Pack could last a total of 69 years!
