

# SAVE-T<sup>®</sup> SCREEN-PRO<sup>™</sup> DOOR SYSTEM

New  
Modular  
Design!

- **Screen-Pro<sup>™</sup> Door System**

Keeps flying insects and birds out while allowing fresh air in!

- **All-Season Panel System**

Use screen mesh panels in the spring and summer to allow fresh air in and keep insects out. Replace mesh panels with vinyl or clear panels in the fall and winter to create a solid barrier from the cold. Weldscreen PVC can also be used to form a barrier against UV light.

- **Increased Speed**

In-tube motors allow the door to travel at speeds up to 12" per second.

- **Applications**

Warehouses, manufacturing plants, loading docks, food processing facilities, and more.

- **Easy-To-Install**

Installs up to 40% faster than other screen doors. Mounts in jamb, on the face of a wall, or around an existing overhead door.

- **Improve Work Environment**

Increase employee comfort while deterring theft and trespassing.

- **Activation Styles**

Spring-loaded tube or chain hoist for manual activation and in-tube or external motors for automatic activation.

- **Improved Safety Features**

New bottom breakaway bar, optional photo-eye, and optional reversing edge.

TMI's new Screen-Pro<sup>™</sup> is a modular, flexible roll-up door system that improves working environments and reduces energy costs year round.

The Screen-Pro<sup>™</sup> is an ideal alternative to expensive, fast-moving roll-up doors. Screen-Pro<sup>™</sup> doors will aid in cutting energy bills and eliminate loss of product due to contamination.

Screen-Pro<sup>™</sup> doors can be mounted on interior or exterior openings and can be used in a variety of applications. TMI's All-Season modular design allows customers to replace bug mesh screens with solid vinyl, clear, or weldscreen panels, creating a controlled environment throughout the entire year.

# SAVE-T® SCREEN-PRO™ DOOR SYSTEM

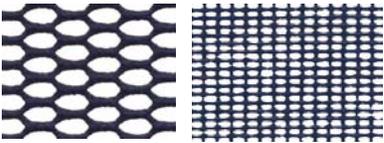

The Screen-Pro™ modular door system has a number of innovative design features that set it apart from the rest of the insect door and screen industry. Easily interchangeable panels create an effective environmental barrier all year round.

## • Maximum Door Sizes

Spring Loaded: 12' wide x 12' high  
Chain Hoist: 14' wide x 14' high  
In-Tube Motorized: 14' wide x 14' high  
External Motorized: 14' wide x 14' high

## • Panel Materials

Standard panels are made of 17 x 11 PVC coated mesh: small enough to keep flying insects out while letting fresh air flow into your facility.

## Bird Mesh (Top) Bug Mesh (Bottom)

Optional panels include Blue Bird Mesh, 18.5 oz, 22 oz, or 40 oz PVC coated vinyl in a variety of stocked colors, clear PVC, weldscreen PVC, or any combination of the above.

\*Guard-Pro™ Aluminum or Stainless Steel Chain Mesh Door available.

## • Photo-Eye (Optional)

Increase the safety of the Screen-Pro™ by including a Photo-Eye sensor, automatically reversing the door when there is an object in the door's path. Optional reversing edge is also available.

## • Save-T Breakaway Bar

Extruded aluminum bottom bar breaks away, preventing damage to the screen and door tracks. Breakaway bar is easily slid back into the track.

## • Optional Valance

Aesthetically pleasing aluminum or vinyl valance protects the drum and roll-up mechanism.

## • Side Mesh Panels (For Stand-Off)

Mesh panels seal the area between the wall and the door tracks, preventing insects from flying in through the side.

## • Aluminum Wind Stiffeners

Extruded aluminum wind stiffeners are up to 50% stronger than other industry models, helping to combat wind and negative pressure.

## • Modular Panel Construction

Interchangeable door panels can be inserted into our custom, extruded aluminum wind stiffeners, allowing for quick and easy replacement or repair of any panel.

## • Extruded Guide Tracks

Custom guide tracks with weatherseal and UHMW inserts create a tight seal between the screen and track while reducing friction and preventing black aluminum dust.

## • Activation Options

Each motorized Screen-Pro™ comes with an up/down rocker switch. Optional remote control activation is available.
